

CUSTOMER RETENTION ANALYSIS

Submitted by:
VIVEK ANAND

ACKNOWLEDGMENT

I would like to express my special thanks of gratitude to the source profitwell.com which helped me to accomplish this project.

INTRODUCTION

What is customer retention?

Simply put, customer retention rate is the ability of a company to retain its customers over a given period of time. There are a number of actions and activities certain companies take to reduce churn and increase customer retention. Focusing on customer retention is important because it not only looks at how good a company is at acquiring new customers but also how good they are at keeping those customers. While you may have the best acquisition process in the business, if your retention is terrible then it's all worthless.

Conceptual Background of the Domain Problem

Customer satisfaction has emerged as one of the most important factors that guarantee the success of online store; it has been posited as a key stimulant of purchase, repurchase intentions and customer loyalty. A comprehensive review of the literature, theories and models have been carried out to propose the models for customer activation and customer retention. Five major factors that contributed to the success of an e-commerce store have been identified as: service quality, system quality, information quality, trust and net benefit. The research furthermore investigated the factors that influence the online customers repeat purchase intention. The combination of both utilitarian value and hedonistic values are needed to affect the repeat purchase intention (loyalty) positively. The data is collected from the Indian online shoppers.

5 reasons why retention is the foundation of customer acquisition and growth

- **1. Improve ROI**

The Harvard Business Review reports that research shows increasing customer retention rates by 5% increases profits by

25-95%. While that's a wide range, it shows that even just a small percentage of improved customer retention can make a hugely positive impact on your company's ROI. On the other side of the table, HBR also reports that it's five to 25 times more expensive to acquire a new customer than it is to retain an existing one. You can save money and improve your ROI simply by focusing more on customer retention.

2. Convert more sales

It's easier to sell more to existing customers because the truth is—they already love your product. They already have a rapport with your company and are more likely to spend more on additional features to enhance their already pleasurable experience. An improved customer retention rate results in more sales with a focus on upselling. Your company can offer existing customers additional features or upgrades as an attempt to make a more profitable sale

3. Spend less on TOFU marketing

From email marketing to social media, a business' marketing team usually focuses on attracting new customers. But, when we add customer retention to the mix, the marketing strategy changes. When you focus on customer retention, you can spend less money on top of funnel marketing and focus more on building stronger customer relationships. This is not to say you should forgo traditional marketing methods. Instead, supplement these methods with tactics that ensure customer expectations are met on the product level. The bonus? You'll unlock the power of word-of-mouth marketing from happy customer referrals that feed back into your acquisition strategy. All without making a single cold call.

4. Increase customer LTV

The better your retention strategy, the higher your customer lifetime value (LTV). For reference, LTV is the amount of money a customer is expected to spend on your products during their lifetime. If you have a solid retention strategy in place, then your customer LTV will skyrocket. The goal is to spend as little as possible on acquisition and gain more via LTV. This happens when you focus on retention

5. Earn more referrals

Loyal long-term customers are more likely to refer their friends and acquaintances to your business. Voluntary referrals are the best free acquisition strategies out there. When a customer has been with your company for a while and enjoys the experience, they are more likely to recommend your products to someone else. This social proof does most of the "sales" work for your company. When retention becomes a priority, acquisition happens naturally.

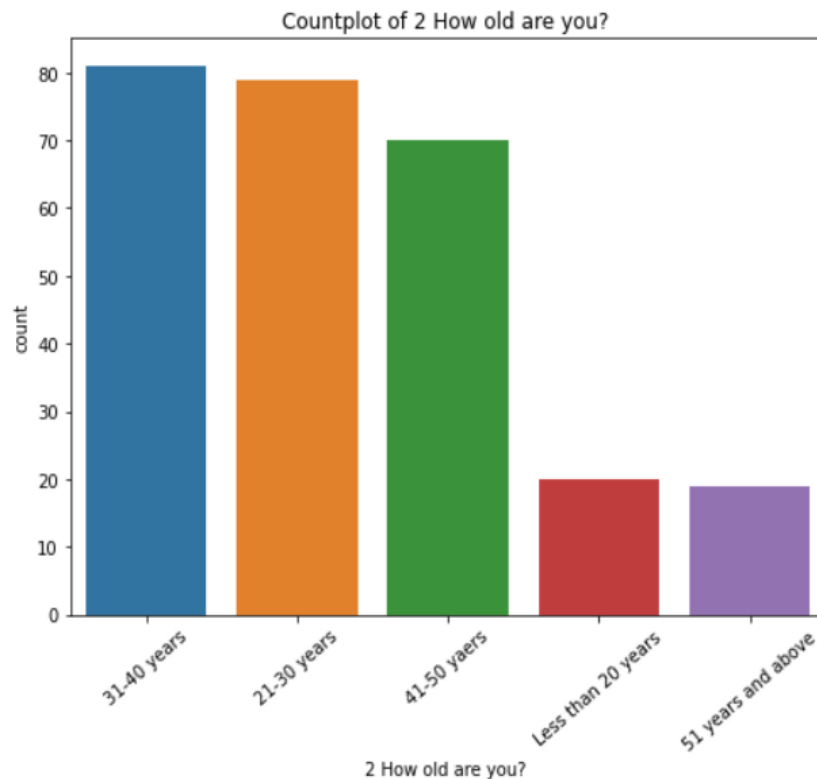

Data Analysis

```
Female    181
Male       88
Name: 1Gender of respondent, dtype: int64
```

Observation:

Majority, 181 of the customers are Female whereas Male are 88.

```
31-40 years      81
21-30 years      79
41-50 yaers     70
Less than 20 years  20
51 years and above  19
Name: 2 How old are you? , dtype: int64
```

Observation:

Majority, 81 of the customers are from age group 31-40 years.

Delhi	58
Greater Noida	43
Noida	40
Bangalore	37
Karnal	27
Solan	18
Ghaziabad	18
Gurgaon	12
Merrut	9
Moradabad	5

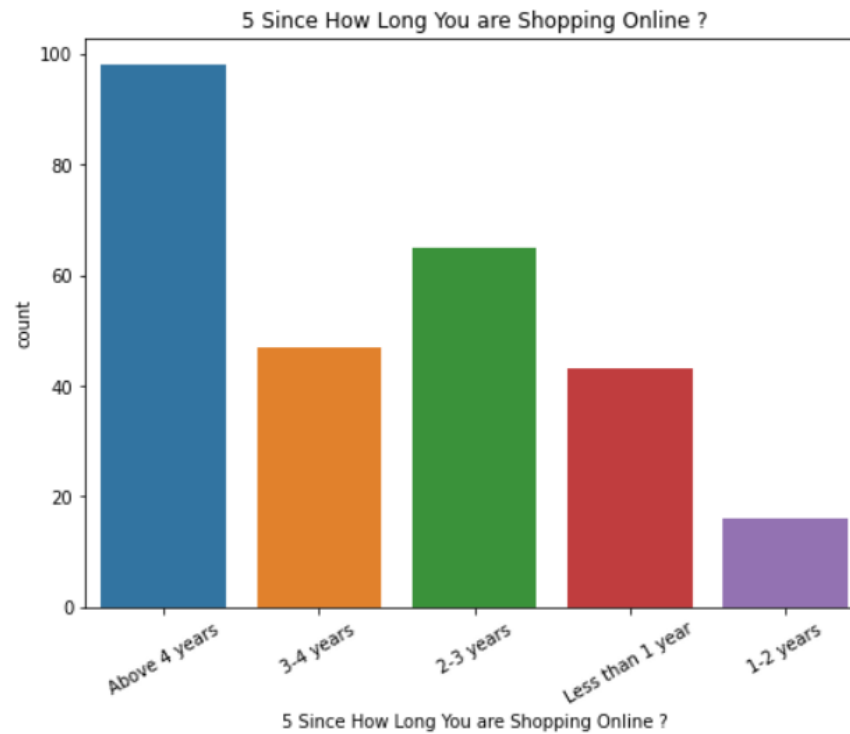

Observation:

Majority, 58 of the customers placed the order from Delhi city.

Observation:

Majority, 38 of the customers placed an order from the pincode 201308.

```
Above 4 years      98
2-3 years          65
3-4 years          47
Less than 1 year   43
1-2 years          16
Name: 5 Since How Long You are Shopping Online ?, dtype: int64
```

Observation:

Majority, 98 customers are shopping since above 4 years.

```
Less than 10 times    114
31-40 times          63
41 times and above   47
11-20 times          29
21-30 times           10
42 times and above    6
Name: 6 How many times you have made an online purchase in the past 1 year?, dtype: int64
```

Observation:

Majority 114 of the customers have made less than 10 times online purchase in past 1 year

```
Mobile internet    142
Wi-Fi              76
Mobile Internet    47
Dial-up            4
Name: 7 How do you access the internet while shopping on-line?, dtype: int64
```

Observation:

Majority, 189 customers use Mobile internet while shopping online.

10 What is the operating system (OS) of your device?□□□□

```
Window/windows Mobile    122
Android                  85
IOS/Mac                  62
Name: 10 What is the operating system (OS) of your device?\t\t\t\t
```

Observation:

Majority, 122 customers device operating system is Window/windows mobile

26 Trust that the online retail store will fulfill its part of the transaction at the stipulated time

26 Trust that the online retail store will fulfill its part of the transaction at the stipulated time

Strongly agree (5)	141
Agree (4)	86
Disagree (2)	30
indifferent (3)	12

Observation:

Majority, 141 customers Strongly agree to Trust that the online retail store will fulfil its part of the transaction at the stipulated time

```
Strongly agree (5)    185
Agree (4)             58
indifferent (3)       26
Name: 28 Being able to guarantee the privacy of the customer, dtype: int64
```

Observation:

Majority, 185 customers Strongly agree to Being able to guarantee the privacy of the customer

Observation:

Majority, 64 customers agree that Amazon.in, Flipkart.com, Paytm.com, Myntra.com, Snapdeal.com are Easy to use website or application

Observation:

Majority, 61 customers agree that Amazon.in Reliability of the website or application

Observation:

Majority, 79 customers agree to Amazon.in to recommend to a friend

Conclusion

- Retention analysis is an integral part of your customer retention and marketing strategies. By taking full advantage of the data you collect by tracking customer behaviour, requesting feedback, and studying important metrics, you can decrease the churn rate, improve customer satisfaction, and boost your revenue

Limitations of this work and Scope for Future Work

We are able to properly analyse the valuable feedback of the customers but given, the dataset was very small as it may result in bias understanding. If we are able to increase the feedbacks from more customers all over it would provide a great understanding of the strategies we will have to use to improve customer retention.
